An Algorithmic Trading Strategy Example. The classic dual moving average (DMA) trading strategy executed by computer code is an example of an algorithmic trading system using a trend-following strategy. There are only two rules: When the 50-day moving average crosses above the 200-day moving average, the trend is up and we buy.

The first strategy is a simple dual moving average (DMA) strategy trading Apple (AAPL) for 2017. We start with \$1,337.00 and end with \$1,354.77. As you can see, the code to create a DMA strategy in Backtrader is more simple than in the Zipline DMA strategy , but as stated previously, the return analysis is more simplistic, too.
