Bridge And Gantry Crane Drivers

A crane is a type of machine, generally equipped with a hoist rope, wire ropes or chains, and sheaves, that can be used both to lift and lower materials and to move them horizontally. It is mainly used for lifting heavy things and transporting them to other places. The device uses one or more simple machines to create mechanical advantage and thus move loads beyond the normal capability of a human.

The ample width allows lift truck drivers to stay firmly in the middle of the ramp. The 8-inch steel curbs keep forklifts from veering off the ramp even when poor steering takes the lift truck too far to one side. The 30-foot length allows for a steady grade that makes controlled forklift loading or unloading simple.
