children with Wolff-Parkinson-White syndrome at risk for sudden death. Background . In adults with Wolff-Parkinson-White syndrome, a shortest RR interval <220 ms during atrial fibrillation is a sensitive marker for sudden death.

Impact of clinical history and electrophysiologic ...

Objectives This study examined the clinical and electrocardiographic characteristics and electrophysiologic determinants of sustained slow pathway conduction (SSPC) during sinus rhythm. Background SSPC during sinus rhythm in presence of dual atrioventricular (AV) nodal pathways has not been thoroughly studied. Methods We studied 30 consecutive patients (19 men), whose median age was 31 years ...

Welcome to the Academy of Clinical Electrophysiology and Wound Management. The Academy of Clinical Electrophysiology and Wound Management is a component of the American Physical Therapy Association consisting of approximately 1,000 physical therapy practitioners and students interested in electrophysiology, biophysical agents, wound management, and neuromusculoskeletal ultrasonography.

Academy of Clinical Electrophysiology and Wound Management

Clinical Cardiac Electrophysiology represents advanced training in cardiovascular disease and focuses on management of complex cardiac electrophysiologic disease of the heart. Often called "electrophysiologists," these internists are trained in the mechanism, function, and performance of the electrical activities of the heart.

Clinical and Electrophysiologic Management of Syncope An Issue of Cardiology Clinics, 1st Edition. This issue of Cardiology Clinics devoted to syncope a disorder that is associated with increased mortality.

Clinical and Electrophysiologic Management of Syncope, An ...

Subsequent clinical review by a movement disorder specialist agreed with the electrophysiologic findings in 52 of 60; in the remaining 8, electrophysiologic testing was inconclusive. Conclusions Electrophysiologic testing is an important additional tool in the diagnosis and anatomical classification of myoclonus, also aiding in decision-making regarding therapeutic management.

Electrophysiologic testing aids diagnosis and subtyping
