coffee into the  
fragrant, dark brown  
beans we know and  
love. Why roast?  
Roasting brings out the  
aroma and flavor that  
is locked inside the  
green coffee beans.  
Beans are stored  
green, a state in which  
they can be kept  
without loss of quality  
or taste. A green bean  
has none of the ...

The coffee-roasting process follows coffee processing and precedes coffee brewing. It consists essentially of sorting, roasting, cooling, and packaging but can also include grinding. Bags of green coffee beans are hand- or machine-opened, dumped into a hopper, and screened to remove debris. The green beans are then weighed and
