Observation Form CENTER OBSERVATION INSTRUCTIONS 1. Complete telephone interview with director 2. Complete referenced sections of the ITERS from the interview 3. When you arrive at the center, introduce yourself and ask for an informal tour around the center--look for information you will need on the ITERS 4.

Center Observation Form

The ITERS is a classroom assessment tool designed to measure the quality of group programs for infants and toddlers (birth to age 3) by collecting data through classroom observations and a staff interview. The assessment is a 39-item rating scale organized into seven environmental subscales. The items in the first six subscales are referred to as child-related, and the items in the last subscale are referred to as parent-/staff-related.

INFANT/TODDLER ENVIRONMENT RATING SCALE (ITERS-R)

Additional Notes for Clarification for the ITERS-R These notes do not change any of the requirements in the printed scales, they merely add additional information to help in accurate scoring. Be sure to replace older notes with newer notes. Most recent changes are in blue: 08-09: Much of the Day 01-11: Item 5 07-12: Bleach/water ratio, Item 9

You may know that drinking water is good for you, but it can be hard to determine how much to drink. This article explains the benefits and downsides of drinking 3 liters (100 ounces) of water per ...

Drinking 3 Liters of Water per Day: Benefits and Downsides

Comparison between Items of ITERS-R and ECERS-R (Indicators Scored at 3 and above) This chart has been created for identifying the differences and similarities between the ITERS-R and the ECERS-R when it comes to using the ERS tool for observation in a mixed-age classroom. The items highlighted in gray are the differences between the two scales.

Comparison between Items of ITERS-R and ECERS-R ...

Galileo turned his gaze toward Venus, the brightest celestial object in the sky - other than the Sun and the Moon. With his observations of the phases of Venus, Galileo was able to figure out that the planet orbits the Sun, not the Earth as was the common belief in his time. Curious about the Sun, Galileo used his telescope to learn more.
