Hospitals have been in the world's focus since the COVID-19 pandemic began. Long lines of desperate patients, overcrowded emergency departments (EDs), parking lots turned into triage areas — such images were on the news nightly. As the crisis has eased in some areas, what design and engineering lessons have been learned? How will hospitals be different going forward?

Designing the post-pandemic hospital | Health Facilities ...

Integrated logistic support (ILS) is a technology in the system engineering to lower a product life cycle cost and decrease demand for logistics by the maintenance system optimization to ease the product support. Although originally developed for military purposes, it is also widely used in commercial customer service organisations.

Integrated logistics support - Wikipedia

Disasters and public health emergencies can have a significant impact on healthcare personnel and facilities.
