Congruence and Similarity ...

Explanation: . To find the perimeter of a rectangle, add the lengths of the rectangle's four sides. If you have only the width and the height, then you can easily find all four sides (two sides are each equal to the height and the other two sides are equal to the width).

How to find the perimeter of a rectangle - Basic Geometry

Explanation: . From the figure, we see that there are two congruent pairs of corresponding sides, , and one congruent pair of corresponding angles, . The Side-Angle-Side Theorem (SAS) states that if two sides and the angle between those two sides of a triangle are equal to two sides and the angle between those sides of another triangle, then these two triangles are congruent.

$\angle ACB + \angle BAC + \angle CBA = 180^\circ$ Thus, the sum of the interior angles of a triangle is 180° . Exterior Angle Property of a Triangle Theorem. Theorem 2: If any side of a triangle is extended, then the exterior angle so formed is the sum of the two opposite interior angles of the triangle. In the given figure, the side BC of $\triangle ABC$ is extended.
