Sodium erythorbate is produced from sugars derived from different sources, such as beets, sugar cane, and corn. An urban myth claims that sodium erythorbate is made from ground earthworms; however, there is no truth to the myth.

### Sodium erythorbate - Wikipedia

The paper by Khakzad et al. [23] (from which Figure 9.7 is drawn) adopts the 2008 Imperial Sugar Company explosion and fire [24] as a case study for bow-tie analysis. In their work we see the use of an or gate to determine that the required particulate fuel could have arisen from either sugar that was already airborne or sugar deposits on the ...
