The goal of classical mechanics is to provide a quantitative description of the motion of physical objects. Like any physical theory, mechanics is a blend of definitions and postulates. In

Download Ebook Introduction To

describing this theory it is convenient to first introduce the concept of a point object (a particle) and to start by considering the motion of a single particle.

Solved Problems in Classical Mechanics

The solutions are $(C_y = C_x) = 1/2$ and $(C_z = C_x) = 1/2$, so that $C = C_x(\hat{i} + \hat{j} + \hat{k})$. To evaluate C_x , apply the condition that C is a unit vector.
