1. Introduction. Data is the heart of the accounting profession (ICAEW, 2014). However, big data is much more than accounting and financial data. Big data includes financial and non-financial data, accounting and non-accounting data, and quantitative and qualitative data, which become available in massive amounts, in different formats, and in real-time (Bag et al., 2020; Basukie et al., 2020 ...

Project accounting also focuses on resource management. Every project requires internal resources, external resources and in some cases, third-party material costs. Project managers should track their resources closely to avoid spiraling costs, which is known as time and materials or T&M. Here's what you should consider for each element:
