Neurology guidelines must be created for the two major divisions, as well as all subspecialties that fall under those divisions. For example, while multiple sclerosis (MS) falls under the central nervous system, guidelines must be created that are specific to MS and are differentiated from epilepsy, which also falls under the central nervous system.

Neurology - Guidelines in Practice

Clinical guidelines that support practice and improve care are essential in this era of evidence-based medicine. However, implementing this guidance often falls short in practice. Sharing knowledge and auditing practice are important, but not sufficient to implement change. This article brings together evidence from the study of behaviour, education and clinical practice and offers practical ...

Guideline | JAPANESE SOCIETY OF NEUROLOGY

This clinical practice guideline (CPG) was developed in an effort to streamline assessments utilized across patients with neurologic conditions. The guidelines establish the minimum measures needed to quantify function in the constructs of balance, walking speed, walking endurance/distance and transfer ability.
