The density (more precisely, the volumetric mass density; also known as specific mass), of a substance is its mass per unit volume. The symbol most often used for density is  $\rho$  (the lower case Greek letter rho), although the Latin letter D can also be used. Mathematically, density is defined as mass divided by volume:  $\rho = \frac{m}{V}$  where  $\rho$  is the density,  $m$  is the mass, and  $V$  is the volume.

Serway and Jewett "In problem statements, the synonymous terms light and of negligible mass are used to indicate that a mass is to be ignored when you work the problems." Knight: "Often in physics and engineering problems the mass of the string or rope is much less than the masses of the objects that it connects.
