The Oxford Handbook Of Externalizing

The majority of externalizing behaviors included in this review were self-reported (65 %). Additional reporters included teachers (6 %), program staff (6 %), and parents (6 %). School administrative data were also utilized for the collection of 14 % of externalizing behavior outcomes. The reporter for one externalizing behavior outcome was unknown.

Emotion Regulation and Externalizing Problems. Because of the role of effortful control and related skills in the regulation of emotion and behavior, effortful control has been linked conceptually to the development and maintenance of children's externalizing problems (e.g., aggression, defiance, delinquency).

Emotion-Related Self-Regulation and Its Relation to ...

Through the years, the concept of family has been studied by family therapists, psychology scholars, and sociologists with a diverse theoretical framework, such as family communication patterns (FCP) theory, dyadic power theory, conflict, and family systems theory. Among these theories, there are two main commonalities throughout its findings: the interparental relationship is the core ...

Gottfredson and Hirschi advanced self-control theory in 1990 as part of their general theory of crime. Self-control is defined as the ability to forego acts that provide immediate or near-term pleasures, but that also have negative consequences for the actor, and as the ability to act in favor of longer-term interests. An individual's level of self-control is influenced by family or other ...

330 behavioral control is assumed to increase self-regulation and reduce externalizing 339 problems such as drug use, truancy, and antisocial behavior (Barb er 2002 : 340 Crouter and Head 2002).

(PDF) Parenting Styles and Child Well-being.

Intrinsic motivation will decrease when external rewards are given for completing a particular task or only doing minimal work. If parents heap lavish praise on their child every time they complete a simple task, the child will become less intrinsically motivated to perform that task in the future.

Differences Between Extrinsic and Intrinsic Motivation

Attachment as an empirical research paradigm may be regarded as having fully commenced only with Ainsworth's work. This chapter begins by introducing the biographical context of Ainsworth's work, including her early work at Toronto University. Ainsworth's concept of 'security' and her attempt to develop self-report measures of security are reappraised, placing Ainsworth's work in ...

Abstract. Bullying has become one of the most common violent behaviors among adolescents worldwide. The current study examined the relationship between family functioning, happiness at school, and self-esteem with bullying among adolescents. A total of 121 adolescents (45 males and 76 females) aged between 12 - 15 years were recruited through simple random sampling.

Introduction. The relationship between victimization and offending, also referred to as the victim-offender overlap, is widely documented. Most victims of crime do not become offenders, but most offenders have been victims. Although the exact number of victim-offenders (offenders that have experienced victimization) is unknown, victimization is highly prevalent within the general population.
