In this guide, we troubleshoot code P0190 on a Volkswagen. Under Engine Control Unit, live sensor data we found that there was a zero reading from the fuel rail pressure sensor. Engine Control Unit was showing a current P0190 code which in this case was caused by a zero reading from the Fuel Rail Pressure (FRP) sensor. Zero reading can be either due to damaged wires or failed sensors.

I just replaced my crankshaft position sensor, referred to as a "engine speed sensor" in all of the service manuals and VCDS. There's no information in the manuals at all (at least the official VW ones you get with an erWin subscription). I was able to find an old thread with some information, but it didn't have any pictures. I documented my procedure today and figured I'd share.
