Order of constructor call for Multiple Inheritance. For multiple inheritance order of constructor call is, the base class's constructors are called in the order of inheritance and then the derived class's constructor. C++ // C++ program to show the order of constructor calls

Order of Constructor/ Destructor Call in C++ - GeeksforGeeks

After the success of the original Call of Duty, Call of Duty 2 came about two years later, bringing some innovations of its own. The most prominent one was automatic health regeneration, something that would become a staple of many modern games. This new mechanic encouraged a riskier, faster-paced playstyle, as opposed to many other games that still featured health bars or health counters.

In a programming language, an evaluation strategy is a set of rules for evaluating expressions. The term is often used to refer to the more specific notion of a parameter-passing strategy that defines the kind of value that is passed to the function for each parameter (the binding strategy), whether to evaluate the parameters of a function call, and if so in what order (the evaluation order).

Evaluation strategy - Wikipedia
