This method isn't as easy to understand as using Control Panel but it does provide a quick way of checking on whether you're running a 64-bit or 32-bit version of Windows, and is especially helpful if you're looking for this information from a command line tool.

## **How to Tell If You Have Windows 64-Bit or 32-Bit**

One way to know if you have worms is by recognizing any unexplained weight loss. Even if you eat normally, you'll be getting less calories and nutrients because the worm is taking them for itself. In addition to weight loss, keep track of any sudden constipation, since worms can cause irritation in the gut, which will cause less water to be absorbed into your body.

## **6 Ways to Know If You Have Worms - wikiHow**

You'll see a table listing your connected disks. If a disk is GPT, it will have an asterisk (that's a \* character) under the "Gpt" column. If it's an MBR disk, it will be blank under the Gpt column. For example, in the screenshot below, Disk 0 and Disk 1 are both GPT disks, while Disk 2 is an MBR disk.

## **How to Check if a Disk Uses GPT or MBR, and Convert ...**

Most homes have an electrical service of between 100 to 200 amps. Amperage is a measurement of the volume of electricity flowing through wires, and this measurement can vary between 30 amps in very old homes that have not been updated, to as much as 400 amps in a very large home with extensive electric heating systems.

## **How to Determine the Size of Your Main Electrical Service**

To tell if you have a tapeworm, look for symptoms like abdominal pain, nausea or vomiting, diarrhea, or weight loss. You may also notice changes to your appetite. If you're still unsure, examine your stool for pieces of the worm, which may look like grains of white rice.
