Another type of common conversion problem deals with conversions between some unit and a prefix of that unit such as a conversion from meters to millimeters. The following table provides a list of some widely used prefixes. For example, 1 gigameter (Gm) = 1,000,000,000 meters (m) or  $10^9$  m, and 1 microinch ( $\mu\text{m}$ ) = 0.000001 in or  $10^{-6}$
