In your Applications folder, you should see either an IBM folder or an SPSS folder. Open that folder. Inside that folder should be a folder called either SPSS,19, 20, 21, or 22 (depending on your specific version). Open that folder. You should see an application called License Authorization Wizard. Double-click that program.

SPSS - Update License Code on Existing SPSS Installation

SPSS now creates a scatterplot with different colors for different treatment groups. Double-clicking it opens it in a Chart Editor window. Here we click the “Add Fit Lines at Subgroups” icon as shown below. Result. The main conclusion from this chart is that the regression lines are almost perfectly parallel: our data seem to meet the homogeneity of regression slopes assumption required by ...

GNU PSPP is a program for statistical analysis of sampled data. It is a free as in freedom replacement for the proprietary program SPSS, and appears very similar to it with a few exceptions. The most important of these exceptions are, that there are no “time bombs”; your copy of PSPP will not “expire” or deliberately stop working in the future.

USER'SGUIDE - Kubios

Recently, a colleague of mine asked for some advice on how to compute interrater reliability for a coding task, and I discovered that there aren't many resources online written in an easy-to-understand format - most either 1) go in depth about formulas

Read Book Spss 19 User Guide

and computation or 2) go in depth about SPSS without giving many specific reasons for why you'd make several important decisions.

Intraclass Correlations (ICC) and Interrater Reliability in SPSS

The user can check the DHS Final Report of the survey to know the correct changes required (in the footnote for the table of interest) and make the change in the code files. Instructions for these specific changes for an indicator are given in the code files to guide the user on how to make the change. Working with older surveys:
